

6,975 Cancer Genomes

32 Cancer Types

The infographic features a central yellow circle containing a blue DNA double helix and a cluster of pink cancer cells. Surrounding this central circle are 32 circular icons, each depicting a different organ or tissue with a cancerous growth. The organs shown include the brain, stomach, liver, lung, kidney, pancreas, bone, colon, uterus, bladder, prostate, testis, ovary, and various other tissues. The text '6,975 Cancer Genomes' is written in a black, sans-serif font above the central circle, and '32 Cancer Types' is written below it.

89-Type: Higher resolution in Poly-T tracts
